

GUI Software Engineer

E2M Technologies is a young, fast growing company with its headquarters in Amsterdam, the Netherlands. E2M has a wealth of experience in the design, development and manufacturing of electric motion and control loading systems for a wide variety of applications such as vehicle simulation (aircraft, cars, trains, armored vehicles, etc.), entertainment rides, research and development applications. E2M products are exported worldwide from our EU and US offices. The working atmosphere at E2M is informal, dynamic, challenging and flexible.

A critical part of our products are the graphical user interfaces, which provide visualization of the data collected by the system and allow the user to interact with and control the behavior in real-time. For the development of new user applications as well as improving existing ones, E2M Technologies is looking for a software engineer that specializes in graphical user interfaces. Your main responsibility will be:

- Collecting requirements and iterating on designs with customers and users.
- Development of intuitive interfaces aimed at both end-users and engineers.
- Deployment of both Windows and Linux desktop applications.

Job requirements:

- Bachelor or master's degree in computer science or similar.
- Experience with developing graphical user interfaces and relevant toolkits, such as Qt.
- Experience with programming in C++.
- Strong software design and architecture skills.
- Good communication skills in English.

E2M offers:

- An open, modern working environment, with short communication lines.
- Possibilities for growth in own responsibilities.
- Possibilities for courses and personal development.
- Good salary conditions.
- International working environment.
- Working with interesting high-tech products.

If you think this job is for you, please send your resume and motivation letter to jobs@e2mtechnologies.eu.
